## Madison College Web Gazette

Madison College Web Design • Spring Semester 2011 | Madison, WI

### Betty Rubble Voted Best New Web Design Student

Breaking news from Madison College: **Betty Rubble** has been voted Best New Web Design Student for the Spring 2012 Semester. It was a tight competition, but Rubble proved she had what it took to lead the pack.

The other students in the competition describe Betty as a natural. "This student clearly has the skills needed to succeed in the market today," said instructor Slaghoople.

Betty herself says "I am thrilled an honored to accept this award! I'd like to thank the Academy, my fellow students, my third-grade teacher Mr. Hoopmeister, the guy on the bus with a tinfoil hat, the nice lady who works at the Mobil station and my mom! And to all the cats in sweaters everywhere: keep it real, you guys, and thank you for being "

Nee Betty McBricken, Betty Rubble worked as a cigarette girl/waitress at a resort. There she met and fell in love with her husband Barney. Betty and Barney married shortly thereafter. They currently live in Bedrock with their son Bamm-Bamm. Betty enjoys rock bowling and long walks on the beach.

### Sweater Cat to Appear in Web Class

Students studying web design will encounter cats in sweaters from time to time throughout the semester.

Of course, not every student will want to use a photo of a cat in a sweater on their web page. Students will also have the

opportunity to explore methods of finding low-cost or free images for use

Students studying web design will encounter cats in sweaters from time semester.

Of course, not every student will want to use a photo of a cat in a sweater. Students will also have the opportunity to explore methods of finding low-cost or free images for use on web pages.

### Underwater Web Design

Someday, the ability to create beautiful web pages will be possible anywhere, even underwater. For now, the classrooms at Madison College provide a state-of-the-art environment for learning web skills. Each lab is equipped with the latest state-of-the-art Macintosh computers, and the latest Adobe software. Print stations round out the experience. Even the library at the College has several computer workstations, so students have access to the software outside of their class.

#### What's in this Semester?

- Hand-written HTML
- Learning CSS
- Dreamweaver CS5
- Working with Images

#### Where Can I Get Help?

1. [Lynda.com](#)
2. [Webmonkey.com](#)
3. [w3schools](#)

#### Where can I Buy stuff?

- [Apple education store](#)
- [Wisconsin Integrated Software Catalog](#)
- [Madison College Bookstore](#)

#### Who are my classmates?

- Barney Rubble

#### Stage 3 Checklist

- All content inside #wrapper div.
- #wrapper div centered in browser.
- Content placed into these block-level elements: header, maincontent, aside and footer.
- Content blocks (header, maincontent, aside and footer) positioned correctly with CSS.
- Background image used on some page element.
- Border applied to some block level element (in the example there's a left border on the aside element).
- Everything else working correctly - do all your tags close? Do you have alt attributes on images?
