

1. Always define your site

- **Menu > Site > New Site** or **Menu > Site > Manage Site**
- You will have to do this every time you work on a new computer.

2. Working with Text

- use **Insert Panel > Text**

3. Inserting Images

- use **Insert Panel > Broccoli button**

4. Creating Links -

- use the **Properties Inspector > Browse (folder icon)**
- or use **Properties Inspector > Point to File (target icon)**

5. Buy the book:

6. Watch the movies on Adobe TV:

- <http://tv.adobe.com/show/learn-dreamweaver-cs5/>

7. Creating CSS Styles

- Use the the **Create New CSS Rule** icon at the bottom of the CSS Panel (paper with plus).
- For CSS elements (<p> <h1> etc.,) choose Tag from the dropdown.
- For divs that have ids (<div id="maincontent">) choose ID.
